Source: 2000 census zip code data from American Factfinder on the Census Bureau website. "Adults" refers to persons age 25 and older. The smallest population visible on the scale used for the map is about 5,000 adults, meaning that about 41,000 adults (0.4 percent of all persons in Superzips) lived in Superzips not visible on the map.

THE NATIONAL DISTRIBUTION OF PEOPLE WHO LIVE IN SUPERZIPS

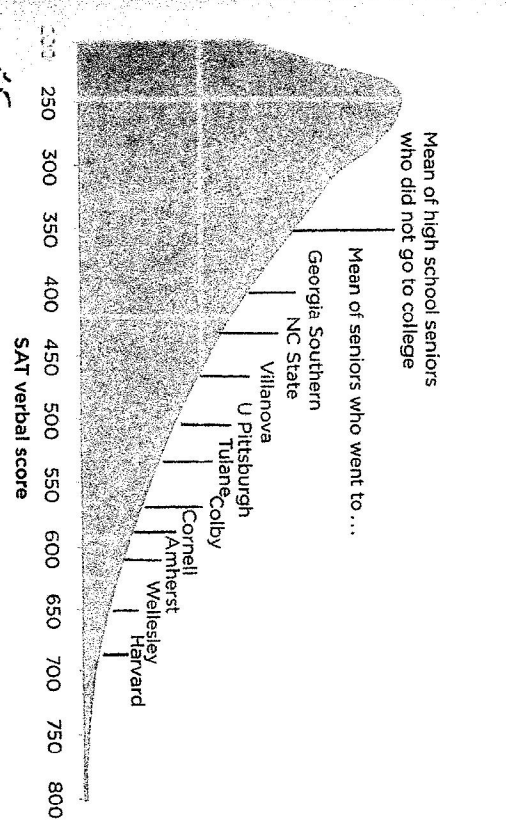

FIGURE 2.1. AMERICAN FAMILY INCOME DISTRIBUTION

Source: Integrated Public Use Microdata Series (IPUMS). Unit of analysis is the family. The base year is 1959 because the income variables in a decennial census or March Current Population Survey (CPS) interview refer to the preceding calendar year.

FIGURE 8.5. DIVORCE

Source: IPUMS. Sample limited to whites ages 30-49 who have married and are not widowed.

FIGURE 8.8. WHITE NONMARITAL BIRTH RATIO FROM 1917 TO 2008

Source: For 1917-39, National Center for Health Statistics, 1941, table Q. For 1940-60, Gross, 1968, table 29. For 1960-2008, annual Vital Statistics reports of the National Center for Health Statistics.

FIGURE 9.10. WORKING WOMEN AGES 30-49 WHO WORKED 40 OR MORE HOURS IN THE PRECEDING WEEK

Source: Author's analysis of IPUMS CPS. Sample limited to women with jobs who worked in the week preceding the interview.

FIGURE 10.4. FILINGS FOR CHAPTER 7 PERSONAL BANKRUPTCIES

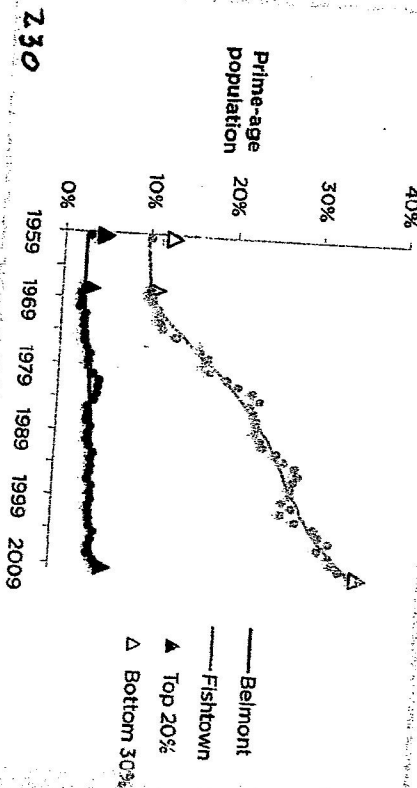

FIGURE 10.3. WHITE ARRESTS FOR INDEX CRIMES

The numerator is based on white prisoners of all ages. The denominator is based on whites ages 18-65. The top 20 percent and bottom 30 percent are shown for 1974 and 2004 because they depend on information about inmates not available earlier or later than those years.

Figure 13.4 combines prime-age white males who weren't making a living and single mothers raising minor children, and assumes that a quarter of the isolates in Fishtown were not part of either of these populations.<sup>8</sup>

FIGURE 13.4. A WAY OF THINKING ABOUT THE SIZE OF THE WHITE NEW LOWER CLASS

Source: GSS. Sample limited to whites ages 30-49.

FIGURE 11.1. NONBELIEVERS

Source: GSS. Sample limited to whites ages 30-49. Data smoothed using locally estimated regression (LOESS).

FIGURE 11.5. REGULAR ATTENDANCE AT WORSHIP SERVICES BY BELIEVERS

Source: Author's analysis of the GSS. Sample limited to whites ages 30-49 who profess a religion and attend worship services more than once a year. "Attends church regularly" includes all who respond "Nearly every week" or more. Data smoothed using locally estimated regression (LOESS).
